# Resignation from obtaining credit for a course

## In what situations can I resign from obtaining credit for a course?

- if the dates of classes, the person conducting them or principles for getting credits have been changed.  
You must notify the HTU of your resignation within 14 days of such a change;
- without giving any reason – this right may be done once during first and second cycle studies. You can resign from obtaining credit through USOS (USOS – student's section – linkage);

Resignation from an obligatory course does not protect you from negative consequences of failing a class required for your study plan. In case of facultative classes, resignation means lack of the failing grade and removal this course from the student's transcript of record.
